Power listed is conducted. This device is a Modular Approval to be used for fixed and mobile applications. Portable applications or all applications in 900 MHz band will be considered unauthorized equipment and will be required a separate FCC equipment authorization. If the second manufacturer/installer markets a device that does not comply with the Grantees instructions for antenna configuration without having obtained a separate FCC equipment authorization for the module and new antenna configuration, that device will be considered unauthorized equipment. The module is labeled with its own FCC ID number. OEM installers must be provided with labeling requirements, antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance. If the module is inside of an end product, the label will not be visible. The internal/external antennas used for this mobile transmitter must provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. Collocation configurations require separate evaluation.

EF: This device may contain functions that are not operational in U.S. Territories except as noted in the filing. This grant has extended frequencies as noted in the filing and Section 2.927 (b) applies to this authorization.
